### 📄 EXAM PROFESSIONAL CLOUD SECURITY ENGINEER TOPIC 1 QUESTION 85 DISCUSSION

Actual exam question from Google's Professional Cloud Security Engineer

Question #: 85

Topic #: 1

[\[All Professional Cloud Security Engineer Questions\]](#)

You are the Security Admin in your company. You want to synchronize all security groups that have an email address from your LDAP directory in Cloud IAM.

What should you do?

- A. Configure Google Cloud Directory Sync to sync security groups using LDAP search rules that have `user email address` as the attribute to facilitate one-way sync.
- B. Configure Google Cloud Directory Sync to sync security groups using LDAP search rules that have `user email address` as the attribute to facilitate bidirectional sync.
- C. Use a management tool to sync the subset based on the email address attribute. Create a group in the Google domain. A group created in a Google domain will automatically have an explicit Google Cloud Identity and Access Management (IAM) role.
- D. Use a management tool to sync the subset based on group object class attribute. Create a group in the Google domain. A group created in a Google domain will automatically have an explicit Google Cloud Identity and Access Management (IAM) role.

Incorrect. GCDS is Google Workspace Admin tool.

Correct answer is A. GCDS only syncs one way - <https://support.google.com/a/answer/106368?hl=en>
