### 📄 EXAM PROFESSIONAL CLOUD SECURITY ENGINEER TOPIC 1 QUESTION 91 DISCUSSION

Actual exam question from Google's Professional Cloud Security Engineer

Question #: 91

Topic #: 1

[\[All Professional Cloud Security Engineer Questions\]](#)

You need to provide a corporate user account in Google Cloud for each of your developers and operational staff who need direct access to GCP resources.

Corporate policy requires you to maintain the user identity in a third-party identity management provider and leverage single sign-on. You learn that a significant number of users are using their corporate domain email addresses for personal Google accounts, and you need to follow Google recommended practices to convert existing unmanaged users to managed accounts.

Which two actions should you take? (Choose two.)

- A. Use Google Cloud Directory Sync to synchronize your local identity management system to Cloud Identity.
- B. Use the Google Admin console to view which managed users are using a personal account for their recovery email.
- C. Add users to your managed Google account and force users to change the email addresses associated with their personal accounts.
- D. Use the Transfer Tool for Unmanaged Users (TTUU) to find users with conflicting accounts and ask them to transfer their personal Google accounts.
- E. Send an email to all of your employees and ask those users with corporate email addresses for personal Google accounts to delete the personal accounts immediately.

A&D.

A- Requires third-party IDp and wants to leverage single sign-on.

D- [https://cloud.google.com/architecture/identity/migrating-consumer-accounts#initiating\\_a\\_transfer](https://cloud.google.com/architecture/identity/migrating-consumer-accounts#initiating_a_transfer)

"In addition to showing you all unmanaged accounts, the transfer tool for unmanaged users lets you initiate an account transfer by sending an account transfer request."

Is the answer is A,D

A - Requirement is third-party identity management provider and leverage single sign-on.

D - <https://cloud.google.com/architecture/identity/assessing-existing-user-accounts> (Use the transfer tool for unmanaged users to identify consumer accounts that use an email address that matches one of the domains you've added to Cloud Identity or G Suite.)

The keyword is here "convert" follow Google recommended practices to convert existing unmanaged users to managed accounts. So why sync unmanaged with Cloud Identity. I would prefer Answers C and D

   upvoted 2 times

  **ThisisJohn** 2 years, 7 months ago

But dont forget about "Corporate policy requires you to maintain the user identity in a third-party identity management provider".

I believe that makes it A and D

   upvoted 1 times

  **mikelabs** 3 years, 8 months ago

Answer is C,D. From GSuite Console you can do both.
