EXAM PROFESSIONAL CLOUD SECURITY ENGINEER TOPIC 1 QUESTION 22 DISCUSSION

Actual exam question from Google's Professional Cloud Security Engineer

Question #: 22

Topic #: 1

[\[All Professional Cloud Security Engineer Questions\]](#)

A website design company recently migrated all customer sites to App Engine. Some sites are still in progress and should only be visible to customers and company employees from any location.

Which solution will restrict access to the in-progress sites?

- A. Upload an .htaccess file containing the customer and employee user accounts to App Engine.
- B. Create an App Engine firewall rule that allows access from the customer and employee networks and denies all other traffic.
- C. Enable Cloud Identity-Aware Proxy (IAP), and allow access to a Google Group that contains the customer and employee user accounts.
- D. Use Cloud VPN to create a VPN connection between the relevant on-premises networks and the company's GCP Virtual Private Cloud (VPC) network.

B - I think it is about to restrict access to 2 company networks, we can control access using IPs ranges, So Firewall rules should be sufficient. No need an extra product like IAP.. and also need users in Cloud Identity or other Idp federated..

The sites should be accessible from any location, not just from the 2 company networks.
