📄 EXAM PROFESSIONAL CLOUD SECURITY ENGINEER TOPIC 1 QUESTION 152 DISCUSSION

Actual exam question from Google's Professional Cloud Security Engineer

Question #: 152

Topic #: 1

[All Professional Cloud Security Engineer Questions]

You need to centralize your team's logs for production projects. You want your team to be able to search and analyze the logs using Logs Explorer. What should you do?

A. Enable Cloud Monitoring workspace, and add the production projects to be monitored.

B. Use Logs Explorer at the organization level and filter for production project logs.

C. Create an aggregate org sink at the parent folder of the production projects, and set the destination to a Cloud Storage bucket.

D. Create an aggregate org sink at the parent folder of the production projects, and set the destination to a logs bucket.

`Selected Answer: D`

D is the answer.

https://cloud.google.com/logging/docs/export/aggregated_sinks#supported-destinations
You can use aggregated sinks to route logs within or between the same organizations and folders to the following destinations:
- Another Cloud Logging bucket: Log entries held in Cloud Logging log buckets.
