Actual exam question from Google's Professional Cloud Security Engineer

Question #: 225

Topic #: 1

[All Professional Cloud Security Engineer Questions]

Your organization's record data exists in Cloud Storage. You must retain all record data for at least seven years. This policy must be permanent.

What should you do?

A. 1. Identify buckets with record data.

2. Apply a retention policy, and set it to retain for seven years.

3. Monitor the bucket by using log-based alerts to ensure that no modifications to the retention policy occurs.

B. 1. Identify buckets with record data.

2. Apply a retention policy, and set it to retain for seven years.

3. Remove any Identity and Access Management (IAM) roles that contain the storage buckets update permission.

C. 1. Identify buckets with record data.

2. Enable the bucket policy only to ensure that data is retained.

3. Enable bucket lock.

D. 1. Identify buckets with record data.

2. Apply a retention policy and set it to retain for seven years.

3. Enable bucket lock.
