📄 EXAM PROFESSIONAL CLOUD SECURITY ENGINEER TOPIC 1 QUESTION 165 DISCUSSION

Actual exam question from Google's Professional Cloud Security Engineer

Question #: 165

Topic #: 1

[All Professional Cloud Security Engineer Questions]

You are a security administrator at your company and are responsible for managing access controls (identification, authentication, and authorization) on Google
Cloud. Which Google-recommended best practices should you follow when configuring authentication and authorization? (Choose two.)

A. Use Google default encryption.

B. Manually add users to Google Cloud.

C. Provision users with basic roles using Google's Identity and Access Management (IAM) service.

D. Use SSO/SAML integration with Cloud Identity for user authentication and user lifecycle management.

E. Provide granular access with predefined roles.

    https://cloud.google.com/iam/docs/using-iam-securely#least_privilege
    Basic roles include thousands of permissions across all Google Cloud services. In production environments, do not grant basic roles unless there is no alternative. Instead, grant the most limited predefined roles or custom roles that meet your needs.
