📄 EXAM PROFESSIONAL CLOUD SECURITY ENGINEER TOPIC 1 QUESTION 142 DISCUSSION

Actual exam question from Google's Professional Cloud Security Engineer

Question #: 142

Topic #: 1

[All Professional Cloud Security Engineer Questions]

You have noticed an increased number of phishing attacks across your enterprise user accounts. You want to implement the Google 2-Step Verification (2SV) option that uses a cryptographic signature to authenticate a user and verify the URL of the login page. Which Google 2SV option should you use?

- A. Titan Security Keys
- B. Google prompt
- C. Google Authenticator app
- D. Cloud HSM keys

Security keys use public key cryptography to verify a user's identity and URL of the login page ensuring attackers can't
access your account even if you are tricked into providing your username and password.
